Reasons for Allowance

The examiner had incorrectly interpreted the disclosure of Dr. Rothman in the most recent Office action as having applied the EMLA cream (anesthetic) after the application of liquid nitrogen. The applicant has pointed out and the examiner has confirmed that the EMLA cream does require about 30 to 45 minutes to numb the tissue, and therefore, would only be effective if applied before the application of the liquid nitrogen. This procedure was further clarified by a telecon between the examiner and Dr. Rothman who stated that she only applied the EMLA cream before the liquid nitrogen. Therefore, the rejection of claims 1-5 in the prior Office action is withdrawn.

In addition, no prior art has been found for claims 1-6, therefore, the application is in condition for allowance.
